Professional Summary

I'm a passionate Web Developer who'll stop at nothing, to realise my dream. For the past 3 years, I've been on a journey to find my passion. I began on Shopify building a drop-shipping store. I decided to cut costs by learning to develop all the tools myself.

My initial HTML, CSS and vanilla JS knowledge is self taught. I have developed the mindset needed to ask for help, filter the internet for answers and not get discouraged when things don't go my way. This was tremendous help when working through a code Boot Camp I joined last September.

Tenacity and patience are two key skill that have found and served me well through this journey and I'm excited in seeing where this path leads me next. I can not wait to climb the career ladder and interact with similar minded connections.

Work Experience

Volunteer, Windsor Walk House Charity Shop, London

JUNE 2012 — JUNE 2014

- Design window displays to attract the gaze of potential customers.
- Price stock and arrange various donations.

Bartender, Waiter, Wimbledon Greyhound Stadium, London

DECEMBER 2015 — APRIL 2017

- Deliver high quality service to VIP guests.
- Ensure I create a comfortable vibe and memorable experience.

Team Leader, Bartender, Compass Group, Chelsea Football Club, London

NOVEMBER 2017 — SEPTEMBER 2018

- Brief my team before each match day about their responsibilities.
- Ensure my team and I complete our tasks to a premium standard.

Barista, Thames Clippers, London

JUNE 2018 — FEBRUARY 2019

- Maintain stock levels and keep to health and safety standards.
- Look out for suspicious packages, fire hazards, commuters who may be at risk of going overboard.
- Interact with commuters, providing information about our route and service.

Deckhand, Thames Clippers, London

FEBRUARY 2019 — PRESENT

- Ensure I keep up with safety training and documentation.
- Look after the safety of commuters, the vessel and myself.
- Fix minor issues with each vessel I am assigned to.
- Train the barista for safety drills.

Education

GCSE , St. Thomas the Apostle College, London

SEPTEMBER 2007 — SEPTEMBER 2012

8 GCSE grades including English, Science and Maths.

A level , Christ The King Sixth Form College, London

SEPTEMBER 2012 — SEPTEMBER 2014

Achieved A Levels in Computer Science, Business Studies and History.

Software Engineering , Kingston University , London

Dropped out due to personal and family problems. My family and I were going through sudden homelessness and I needed to find a steady immediate income.

Diploma in Full Stack Development, Code Institute, London

Graduated a Fullstack focused bootcamp. This has helped me familiarise myself with:

- HTML5
- CSS3
- JS
- Bootstrap
- Python
- Django

Projects

Myrag, Django E-Commerce Website

https://myrag.herokuapp.com/

https://github.com/devisis/myrag

- Helped me achieve an understanding of how to link payment processors and email marketing to my web-apps.
- I learned to use the documentation a lot more as my main source of help.
- I acquire a knowledge of SEO techniques.

Sandra's Kitchen, Django Restaurant Booking Webapp

https://sandraskitchen.herokuapp.com/
https://github.com/devisis/sandras-kitchen

- I learned the benefits of using class based views in Django when building CRUD functionality.
- Gained an understanding of Flask, Bootstrap and the principles of agile development.
- I became proficient at creating and using template tags.

Battleships, Python Game

https://devisis-battleships.herokuapp.com/
https://github.com/devisis/battleships

- This was my first python based project. It helped me work on core python concepts such as working with classes, functions and loops.
- I learned how to deploy a project to Heroku.

Its Coming Home, Beginner HTML & CSS

https://devisis.github.io/its-coming-home/england.html
https://github.com/devisis/its-coming-home

- Gained an understanding of how to format a README and validate my code using w3 and chrome dev tools.
- Learned how to create a custom navbar.

Rock Paper Scissors Lizard Spock, Vanilla JS

https://devisis.github.io/rock-paper-scissors-lizard-spock/
https://github.com/devisis/rock-paper-scissors-lizard-spock

- Became proficient in integrating vanilla JS with CSS and HTML to create a working project.
